

Why Jeran Campanella aka Jeranism is marxist scum and worse

TLDR Synopsis

In sum 1. Jeranism is a Marxist 2. Jeranism pushes occultism/hinduism/kabbalism 3. Jeran is most likely a crypto-jew himself 4. Jeran is exclusively anti-Catholic, regardless of what he says. 5. Jeran is a huge hypocrite and is very dishonest. Willfully ignorant. 6. The rise of modern FE was actually a reaction to a comment by Obama, a marxist. 7. Jeran is a pre-planned agent in agitation and subversion within the FE and other movements for marxist goals. He has very specific goals that have nothing to do with FE, FE is just the vehicle. The outbreak of Covid/BLM and marxist tools and movements is not a coincidence. It's a further tightening of megalomaniacs with control, death and slavery as a goal. 8. By Jerans own admission he's jesuit trained, so by the nonsense jew/crypto spread jesuits-as-ultimate leaders(to defame Catholicism) garbage then Jeran himself is not trustworthy.

=====

Many of us started following Jeranism because of his good high quality research(until about 2018 or so) and personal charm that comes through when he talks. His cause of flat earth is admirable because all non-biased experiments and observations point to a motionless flat geometry for the earth. Only those with an obvious conformist bias to the unproven ideas of those such as Copernicus, Galileo, Newton, Einstein, Hawking, Hubble and all those in between are against this. Their theories are more like fantasies based on abstractions, assumptions and other fallacies. Many of these scientism adherents have murky, occult laced backgrounds as well. More on that later for sure. So let it be said that this writer is NOT against Jeranism because of his flat earth and creationist beliefs. Although I will say that these videos(pre 2018) are only good for the debunking of video based deceptions and deception through modern technology, i.e. plane routes etc. One is best reading rowbothams, gleasons, winships and carpenters books and pamphlets and also watching videos documenting real world experiments only, not meta stuff like critiques of existing globe theory proponents etc.

One problem with Jeranism is that he is anti-religious and in particular is constantly attacking Catholicism. I understand that he claims to be from a Jesuit high school and I also understand that the modern Jesuits are pretty much nothing more than a bunch of rascals subverting traditional catholicism wherever they are. They have been expelled multiple times by multiple Popes only to come back again, and this has been a blight on the Church for centuries. And of course the Judaeo-Masonic-Marxist infiltration and subversion since at least Vatican II has weakened the church immensely. All Vatican 2 popes/prelates are a part of this. The Jesuits were subverted from within probably by crypto-jews long ago, this is the M.O. of judaism. However to judge a whole religion based off of ONLY ones very limited narrow personal experience of individual wolves in shepherds clothing is not just and shows a built in bias or willful ignorance and agenda.

The Doctrine is separate from bad individuals and movements within the church. However Jeranism prefers to slander all of Catholicism shotgun style, which seems to go against his so called impartiality and evidenced based approach. Hypocrite much Jeran? Now he claims to abhor ALL religions but has he ever ranted about the

Talmudic/Kabbalistic satanism of the modern "jews"? Who hasn't read the Protocols of Zion and matched it up against what's happened in the real world for over 100 years? What about any other religions? Nope it's always anti-Christian/Catholic ranting and outright lying in places. He's actually pushed Hinduism/occultism in many of his videos invalidating his being against all religion, just ONE really. One of his main goals is de-christianization, FE is just the vehicle. Much like the whole "Jesuits are behind it all" nonsense, mostly crypto-jews, marxists, protestants and masons are behind this movement. All evidence clearly points to the jews and their tools being the prime movers in world subversion.

Anyone who reads a pre-vatican 2 Catechism can see what exactly Catholicism is about, more so anyone who reads the writings of the Catholic Fathers such as St Augustine, St Thomas Aquinas, etc. Even present Catholicism is admirable in many ways if you ignore the Vatican 2 Popes and other high level people who are just marxists/masons/cryptojews. The Church was the only form of Christianity for 1500 years until the loud Luther and the greedy monarchs and princes came along to smash that unity. We have been paying for it since then with a fully judaised society based on greed, lust, avarice and slavery in which the jews play the leaders and their most powerful tools of freemasonry and communism. None of this is ever mentioned by Jeranism, the link between those three entities is undisputable.

Now as Jeranism channel became more popular in the community I noticed that those of obvious jewish ancestry started to invade. Names like Weiss, Stein and others have somehow easily become entrenched in the jeranism flat earth clique. A little too easy. A big reason is the money they smell no doubt, with apps and other various enterprises such as crypto-coins etc. Another major reason why they showed up is Jerans obvious hatred of Catholicism. Another is that Jeranism is in fact pushing Marxism and marxist(jewish) ideas pretty overtly. To Marx, (who was a crypto-jew like engels), religion is delusion, --SOUND FAMILIAR?-- Another reason was that the benefits that they could get for Jeran, such as access to other jewish or entertainment figures that are connected to FE in some way. An example would be the sicko jew Aron Renan, who produced a documentary about the moon landings that was mostly a waste of tax dollars. He most likely got that grant through jewish gangsterism in public-private dealings. Renan is actually a previous form of the Jeranism-Jewish clique. In Jerans interview of Renan we can see him dodging the issue and also pushing his other disgusting documentaries. Renan also constantly mentions his meeting with the jew Weiss on the east coast, hmm ok. The jews invariably hate Catholicism with their delusional thoughts of persecution, without mentioning the real circumstances of SELF DEFENSE against jewish/crypto jewish subversion and atrocities against others. The USSR was completely jewish started, financed and worked and over 60 million people died, mostly christians and non-jews. The Nazi party was financed by jewish banks. The Talmud is the most hateful sickening racist satanic system and is only equalled by the very dark satanic kabbalah. Two sides of one satanic coin.

Others like Blobhard of Globebusters, a resident of the huge military base known as Colorado, is more than likely an Air Force intelligence officer etc, and others are clearly occultists and push the occult. Now that's precisely what most of the famous scientists they revile were themselves into! Einstein, jew and communist was obviously a kabbalist and fraud. Newton was an occultist and of course was in

Elizabethan England which stole or destroyed Church property, tortured and killed Catholic clergy and made it illegal to be Catholic for a while. Up until after WW1 you could not join political parties in England without swearing to not be "RC". Galileo was condemned by the Catholic Church, but this doesn't rate mention by Jeranism for some strange reason, NOT surprising at all. Many more are freemasons and of other occult traditions.

From some previous research it is obvious that Jeranism et al is into the occult and the occult means the Kabbalah, one way or the other. The Kabbalah is a satanic pantheistic deification of man as God through various means. It utilizes sex magic, tarot, gematria, magic squares, sigils/amulets, path working via the sephirothic tree, triangle dialectics and other means. Jeranism's past book selling heavily featured satanic writers like Marx(cjew), Nietzsche(cjew), Kant(freemason) etc and I recall him selling occult items as well. This is a huge red flag to anyone who is Christian/Catholic who follows him. The other side of the same satanic coin is the Talmud which is the legalistic satanism of the modern pharisees. One way or the other the jews that are around Jeranism are in this tradition of Talmudism/Kabbalism. Jeranism also has pushed various forms of hinduism in a few of his videos, really the talmud/kabbalah is just a subset of hinduism. Ultimately there are only two systems, Hinduism(satanism) and Catholicism.

Now I believe that Jeran Campanella is of marrano/crypto-jewish heritage like legions before him such as Fidel Castro, Eisenhower, Maimonides, Marx, Engels, Lenin, Stalin, Trotsky, Khrushchev, Gorbachev, Truman, Roosevelt and many others whose names you would recognize. He is at a minimum a marxist anti-Catholic bigot fomenting agitation and destabilization. He is also at a minimum in on the crypto-coin scam, pumping coins he most likely has a financial connection to, to get people buying it then once it goes up enough will dump it at the top for a hefty profit. This belies a very devious and frankly jewish mentality regardless of his claimed honesty. The channel has been radio talking head trash for at least 3 years, a total waste of time for listeners. Even his previous well done videos usually have some sort of anti-catholic rant or pushing of hinduism and marxism denoting his real purpose. If it was just all flat earth and other scientific frauds fine, but it never is with this clique.

Jeran has lied outright about the Catholic Mass, it has mostly New Testament laced all over it, anyone who reads a missal can see that. It was also practiced for over 1500 years with traditional Catholic prayers included. He is a dishonest liar. Like the analysis of the so called moon landing photos, if one is proven a fraud then ALL of them are implicated. Same goes for Jeran and his clique.

Modern flat earth IS actually being USED as a psyop for marxist agitation and destabilization of the niche community that would be interested in it, a dialectical exercise of collapsing two opposing forces into a synthesis to be further synthesized by later dialectics for a pre-determined final goal. This is at bottom satanic Kabbalism. If you notice that the so called kickoff of modern Flat Earth was the marxist Obamas mention of it, this was actually an embedded signal by him to those cadres out there who were already prepared for this operation via either mind control programming or other means. Jeranism is one of these. Blobhard is one of these. Eric Dubay another. The thesis-antithesis-synthesis also applies to physical

and intellectual conflict and this is what we have here in FE and other topics. Worked by knowing plants and carried on by some not part of the trick. I've had comments stating the psyop of FE deleted by good old censorship hating Jeran, another indication of his real methods and agenda.

Moreover Jeran consistently misunderstands and/or distorts the Bible. It's called the NEW Testament for a reason. Any quotes from the NT Jeran? The OLD Testament was akin to how we are reared by our parents, with behavioral methods, in which we all have faith is in the best interests of the child by loving parents. When we have GROWN up and become adults if we have been raised well we know and willingly follow the teachings of the Bible and the Catholic Church, we willingly follow good morals. We are in the NEW testament time period. Jeran gives a lot of time to FE and other lit but ignores going to St Augustine, St Chrysostom, St Ligouri and the many doctors of the church to get an informed reading on both the OT and the NT by those who dedicated their lives and written thousands of pages on them and on Church doctrine. This also screams willful agenda.

If not, we are physically adults but spiritually we are unruly children and will only listen to the OLD methods, in that context it's jail/fines/drugs etc and a broken terrible life in general. If you believe in an afterlife and a loving God then an average life of 80 or so years is nothing compared to the eternity of the afterlife, any suffering and even death if it results in you entering eternally Gods spiritual kingdom, would be fine even preferrable. Jeran also ignores the context of the time period which Old Testament stories take place. Applying modern values to different time periods DOES NOT WORK for judging the people in the said time periods. jeran has a proven ignorance of the New Testament and even spiritual understanding. Even the OT has a primarily SPIRITUAL meaning, NOT physical. Jeran, like the jews, wants God to be both an ATM for them and to be subservient to them, this is satanic. I would warn everyone I can off of Jeran or his clique. He does have a few excellent videos no doubt but there is so much evil filler and evil agenda it's just not worth it. Just read rowbotham, Gleason and others and also go to other YT channels that are JUST FE, not using FE as a vehicle for subversion.

In sum 1. Jeranism is a Marxist 2. Jeranism pushes occultism/hinduism/kabbalism 3. Jeran is most likely a crypto-jew himself 4. Jeran is exclusively anti-Catholic, regardless of what he says. 5. Jeran is a huge hypocrite and is very dishonest. Willfully ignorant. 6. The rise of modern FE was actually a reaction to a comment by Obama, a marxist. 7. Jeran is a pre-planned agent in agitation and subversion within the FE and other movements for marxist goals. He has very specific goals that have nothing to do with FE, FE is just the vehicle. The outbreak of Covid/BLM and marxist tools and movements is not a coincidence. It's a further tightening of megalomaniacs with control, death and slavery as a goal.

Jerans heros like Sagan and Feynman were both jewish and both illogical liars and storytellers. Sagan was just a celebrity of the space culture nothing more. Feynman, regardless of his statements had a book in which he described things like that anti-matter is just light particles that go back in time(his pdq book) etc He's no one to be admired, part of the deception/fairytale scientism.
